16 Ways Modern Cloud ERP Helps Companies Grow

Finding the optimal solution for your business, or even the ideal partner to assist you in getting there, is never simple. Cloud 9 ERP Solutions, a Gold Certified Acumatica Partner, has worked with businesses like yours to develop and deliver Acumatica Cloud ERP, a solution that is ready to meet your needs.

This blog post aims to demonstrate how Acumatica Cloud ERP Software can help manage your entire business. Your corporate objectives combined with our I.T. expertise will get you the results you need. Here are 16 ways modern Cloud ERP helps companies like yours grow.

1. A Scalable, Cloud-Based ERP Platform

It is difficult and costly to maintain legacy ERP applications. Utilize Acumatica's Open APIs to evolve and expand your business with a secure, future-proof cloud platform.

2. Connect All Your Systems with One Powerful ERP Suite

Most organizations using entry-level accounting software or outdated ERP solutions aren't thriving. Acumatica General Business Edition saves I.T. costs for growing enterprises with a comprehensive accounting and customer management application suite.

3. Streamline Processes and Minimize Data Entry

Business today moves faster than ever. Modern cloud ERP software like Acumatica helps expanding firms streamline and automate business operations to increase productivity while reducing errors.

4. Manage Your Organization with Real-Time Data and Dashboards

Acumatica's robust reporting and analytical tools give firms a 360-degree perspective of their operations. Since everything is on one platform, data can be drilled down to facilitate cross-application transactions, helping you track key performance indicators.

5. Reduce Risk with Enhanced Compliance Features

Quality compliance regulations cause significant slowdowns. Establish a solid foundation with Acumatica to manage OSHA, HIPAA, the Fair Labor Standards Act, workers' compensation, union requirements, and other regulations.

6. Utilize an Advanced Accounting Suite

Acumatica General Business Edition contains robust accounting software and

innovative applications powered by A.I. and machine learning, allowing it to connect to thousands of financial institutions and expedite intercompany transactions.

7. Manage Resources with Native-Fixed Assets

The incorporated Fixed Assets module in Acumatica allows you to customize stock depreciation schemes. Keep track of your fixed assets and depreciation estimates.

8. Empower Workers with Mobile Access

Many employees now work from home. Every Acumatica feature is web-based, making it suitable for mobile workers. Workforces may access Acumatica wherever, regardless of VPN reliability or additional hardware and software costs.

9. Trust in Embedded Marketing and Sales Automation

Business executives must capitalize on every opportunity and explore new ways to increase revenue from existing customers. Acumatica General Business Edition helps organizations generate more leads with connected marketing automation.

10. Exceed Customer Expectations with Acumatica's Native CRM

A 360-degree view of every client interaction is possible with Acumatica's native CRM application. You can access construction projects, support issues, and even manufacturing estimates and bids securely via embedded CRM.

11. Automate Purchase and Sales Order Processing

Customers use Acumatica Point of Sale powered by IIG for in-store sales and native online storefront integrations with Shopify and BigCommerce. Whatever you buy or sell, Acumatica can help you handle orders.

12. Add Specialized Applications for Your Industry

The beauty of current ERP software like Acumatica is the flexibility to configure optional native applications to support all aspects of the business without intrusive customizations and costly one-off integrations.

13. Manage Employees Effectively

Foster employee relationships with data-rich tools that support employee success. Acumatica's modern user interface and mobility make onboarding new employees simple, especially for remote workers or younger employees who are more familiar with mobile apps.

14. Partner with an ERP Publisher Who Cares About Your Success

Acumatica is unique among midmarket ERP publishers. First, unlike our peers, Acumatica develops, sells, and supports only one ERP application – Acumatica. This sole focus means that every employee is working on the application you use to run your business.

15. Minimize Risk with Acumatica Support Services

Unfortunately, when servers fail, users get locked out of the system. Acumatica provides three levels of product and technical support with varying degrees of assistance to accessing help, technical resources, and troubleshooting information.

16. Take Advantage of Our Specialized Apps and Local Services

Acumatica is one of the few midmarket ERP publishers dedicated to an indirect sales and service model. Acumatica has over 340 global partners who provide localized consulting, implementation, and support services.

Partner with Award-Winning Acumatica

Acumatica provides a wide range of solutions that can handle anything from inventory control to working capital, sourcing, sales, warehouse management, and more, thanks to the magic of integration.
